OXEN WORKWEAR INC.

OXEN RIP-STOP POCKET CONSTRUCTION U.S.P.O. PATENT PENDING

MAKERS OF PREMIUM WORKWEAR

QUALITY, COMFORT, PERFORMANCE
FOR THE WORKMEN OF AMERICA.

The design philosophy of Oxen values, above all else, function over form. To this end, great attention is always paid to perfect the relationship between man and Workwear. Oxen research and development has invested enormous resources to handle the tough problems of today's active workmen through innovative technical solutions. At Oxen, Workwear is built to last and quality standards are continually surpassed. Rigorous testing and ongoing research help Oxen engineers determine and develop optimal Workwear to match workers' preferences. Premium quality U.S. denim, mallard duck canvas and U.S. military standard hardware insure the integrity of construction and inclusion of utilitarian features. Oxen is premium brand Workwear, crafted for comfort, built for performance; a jean that works as hard as America's workmen do.

OX-RIPSTOP® POCKET CONSTRUCTION U.S.P.O PATENT PENDING

Our revolutionary patent pending rip stop feature was developed by engineers to improve strength at the critical point (traditionally a weak spot) where back pocket meets pant. A double yoke provides two layers of reinforcement while dual bar tacks fuse pocket and yoke together; seam enforced pockets add extra strength. Together, these elements produce a pocket with a tear strength of 150 pounds. In combination, the size of the pocket has been enlarged in scope, affording optimum space for plans, maps or tools.
